# Adding a Kumu Project to a Post
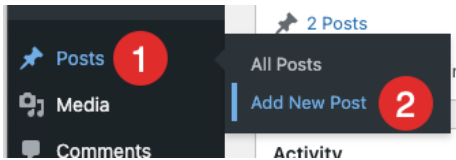

**Reminder 1:** After you have completed your Kumu project be sure to take and save a screenshot of it, you will need it in Step 3.

**Reminder 2:** Ensure you are logged in to Wicked Problems and on the site's dashboard before attempting the steps below.

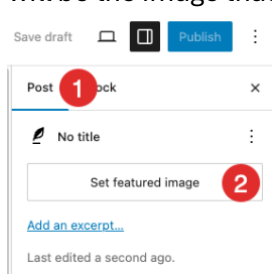

The steps below outline how to add a Kumu project to a post in Wicked Problems.

1. Select **Posts** -> **Add New Post** from the left-hand menu

2. Give the post a title by filling in the **Add title** area

3. Click the **Set featured image** located in the **Post** menu on the right side of your screen (this will be the image that will display in the gallery on the homepage).

4. Drag and drop your screenshot to the *Drop files to upload* area or use the **Select Files** button to manually upload the image.

5. Fill in the *Alt text* field (a brief description of the image) and click the **Set featured image** button

6. Click the **+ symbol** located on the right below the post's title and search for **html** -> click the **HTML** block

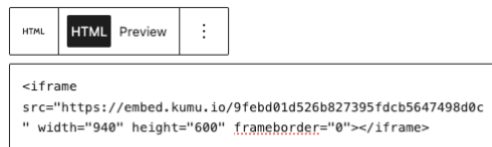

7. Copy the embed code from Kumu

8. Paste the embed code into the HTML block

9. Click the **Publish** button that is in the upper right corner of your screen
